

## Customer Pre Trip Checklist

---

We take exceptional care in the loading/unloading and moving of your vessel. To ensure that nothing gets damaged enroute please follow these safety guidelines & tips. Playa Marine Inc. is not responsible for any damage caused by the following precautions not being taken by the owner.

- Make certain that all loose items in your vessel such as plates, galley utensils, personal items or any other non secured items have been secured or removed from the vessel.
  - Empty all fuel and water from the vessel
  - Disconnect all Battery Cables
  - Remove any device or fixture that extends beyond the hull of the vessel such as antennas, radar, compasses or depth sounders. These devices should be secured inside the vessel for shipping.
  - Any non secured decor such as tops, curtains, seat cushions
  - Remove the plug from the craft
  - You will need to store and secure Plastic and Plexiglas windshields below
  - If you are moving the boat during the winter months, then you need to winterize the engine, toilets, the water systems or any other weather sensitive device on the vessel.
  - When moving a sail boat, you must remove all standing rigging, lights, spreaders, wind indicators and all other types of mast rigging prior to transport.
  - All personal belongings should be removed from the boat before transport. These include cash and valuables, clothing, sporting goods or any other materials that are not part of the vessel.
-
